

I am Bill Gates, and I work at Oracle, a private hospital called Beacon Hospital in Ireland. It is known for its advanced medical technology and services, including physiotherapy, Covid screening, and plastic surgery. We have over 1,700 consultants, physicians, nurses, and allied therapists who provide high-quality medical care. Patients can also self-pay for treatment at our hospital. We prioritize patient safety and quality, and we encourage feedback from patients through our email feedback system.
